Work Experience

📅 february 2021 — present (1 year)

Learning new stack

I applied all the studied technologies in practice (project allflags.ru)

A short list of practical skills:
- VPS administration, work with Heroku, AWS, Yandex.Cloud;
- Configuring Nginx, Traefik, Prometheus, Grafana;
- Working with Docker and Docker Compose, basics of CI/CD;
- Codestyle (flake8, black), testing (pytest, coverage), documenting (Sphinx);
- Working with version control and workflows (git, github, git-flow, github-flow);
- Working with Django, DRF, PostgreSQL, Redis, Celery, Flower.

📅 october 2015 — present (6 years 4 months)

PKF Luidor, Nizhny Novgorod (Car factory / special vehicles)

Web developer, SEO specialist

- Developed a service for finding spare parts by VIN (backend: Django/DRF, frontend: Vue.js);
- Development and SEO of the company's websites on 1C-Bitrix;
- More than 3 years of experience in remote work.

📅 april 2012 — october 2015 (3 years 7 months)

Freelance, own projects

Full-stack developer, SEO specialist

- Website development and SEO (Joomla, WordPress, 1C-Bitrix, OpenCart).

📅 september 2011 — april 2012 (1 year 1 month)

Redox, Moscow (commerce / health products)

Product Manager

📅 september 2008 — april 2011 (2 years 7 months)

Redox, Nizhny Novgorod (retail / health products)

Sales Manager

📅 november 2006 — may 2008 (1 year 7 months)

Telma Soft, Nizhny Novgorod (software development)

Trainee engineer in the software development and testing department

- Internship while studying at the university

About

I love web development. More than 10 years of experience in website development and SEO helped me to acquire skills in frontend, backend, DevOps and project managment. I hope that the new stack and deepening in the backend will allow me to participate in the development of larger and more interesting projects.

My objectives for this year: to start a career as a backend developer in a modern company and grow to the Middle level.

Education

LOBACHEVSKY SUNN

Lobachevsky State University of Nizhny Novgorod

📅 2004-2009 (5 years), full time, specialist

Faculty of Computational Mathematics and Cybernetics

Specialty: **Applied Mathematics and Informatics**

Qualification: **mathematician, system programmer**

Навыки

Python | Django | DRF | JSON APIs | Traefik | PostgreSQL | Celery | Redis | Linux | Nginx | Docker | Docker Compose | Git | Prometheus | Grafana | CI/CD | HTML | CSS | JavaScript

Languages

Russian	Native
English	Intermediate

Courses

Docker | 2021, slurm.io

Build a Backend REST API with Python & Django | 2021, Udemi

Algorithms and Data Structures in Python 3 | 2021, YouTube
